# ABOUT US

gritaa systems is a designers and manufacturers of Bespoke Steel Doors, Partitions, Windows and other beautiful interior systems. With a focus on High End Residential development, architectural projects and Commercial Fit-out projects. We Design, Manufacture and Install our doors bespoke for every project. We can support any project either a private client, project manager, property developer, architect or construction company then get in touch to find out how we can assist in your next project. The quality of our doors and windows goes far beyond how they look. To really get a feel for the quality craftsmanship that makes gritaa systems so special, you need to come and experience for yourself.

**more than  
design is  
passion...**

# Glazing beads

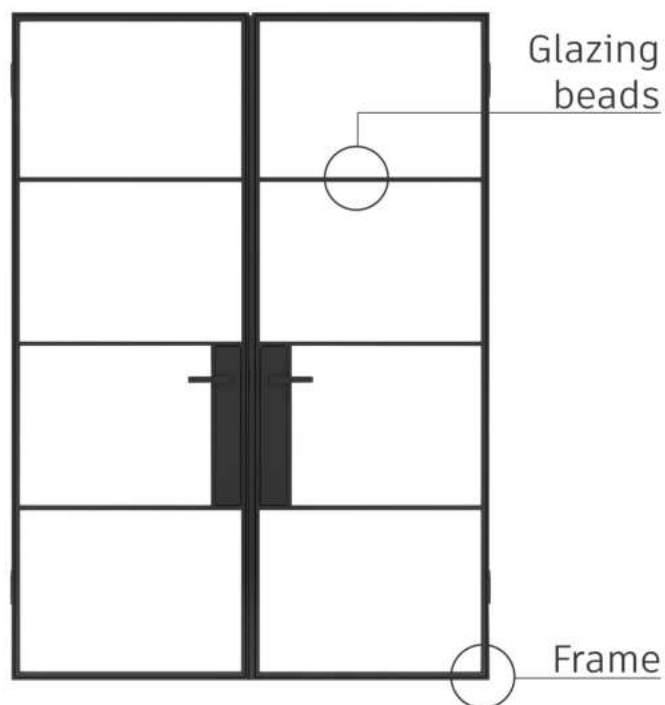

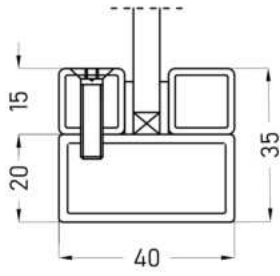

Premium line

Smart line

The modern loft door glass rails are available in two versions: the Slim glazing beads give the doors a particularly narrow and elegant look with a viewed width of only 15 mm, while the angled glazing beads authentically emphasise the industrial style with their visible screw fittings.

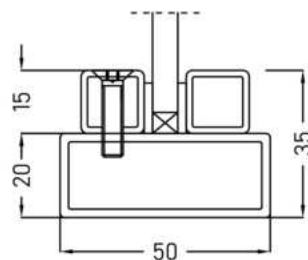

FRAME  
CLASSIC

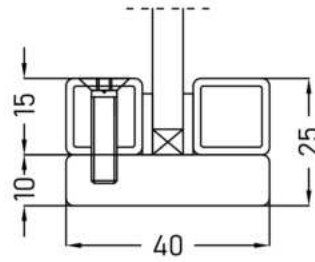

## The classic

The specially designed shape of our profiles, combined with the highest quality galvanised steel with just a 20mm steel profile, has allowed us to produce exceptionally thin door frames without compromising on durability and stability, lasting for decades.

FRAME  
CLASSIC+

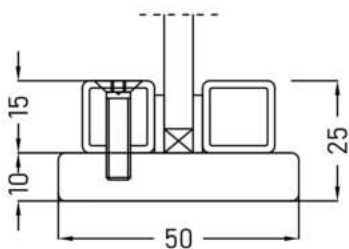

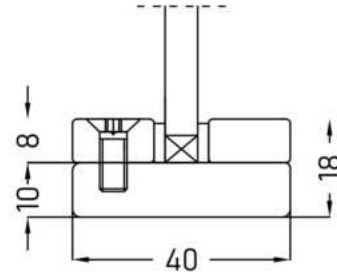

## FRAME SLIM

### The elegant

With the unlimited options of design, screens allow to open up even the biggest spaces letting in the natural light flow between rooms. Often incorporated to design a seamless transition and to achieve spaciousness. With advanced technology, steel is robust enough to support the biggest glass panes.

## FRAME SLIM+

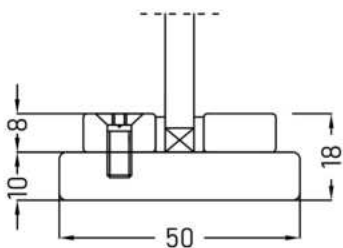

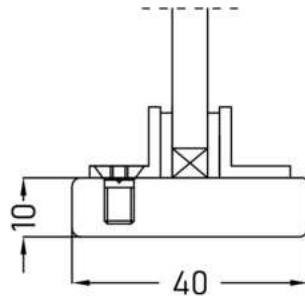

## FRAME ULTRA SLIM

### Minimal Steel | Maximum Glass

Unique to gritaa systems, we have carefully designed our Profiles to create some of the slimmest sightlines in the industry, giving you a sophisticated, clean look that maximizes natural light:

## FRAME ULTRA SLIM+

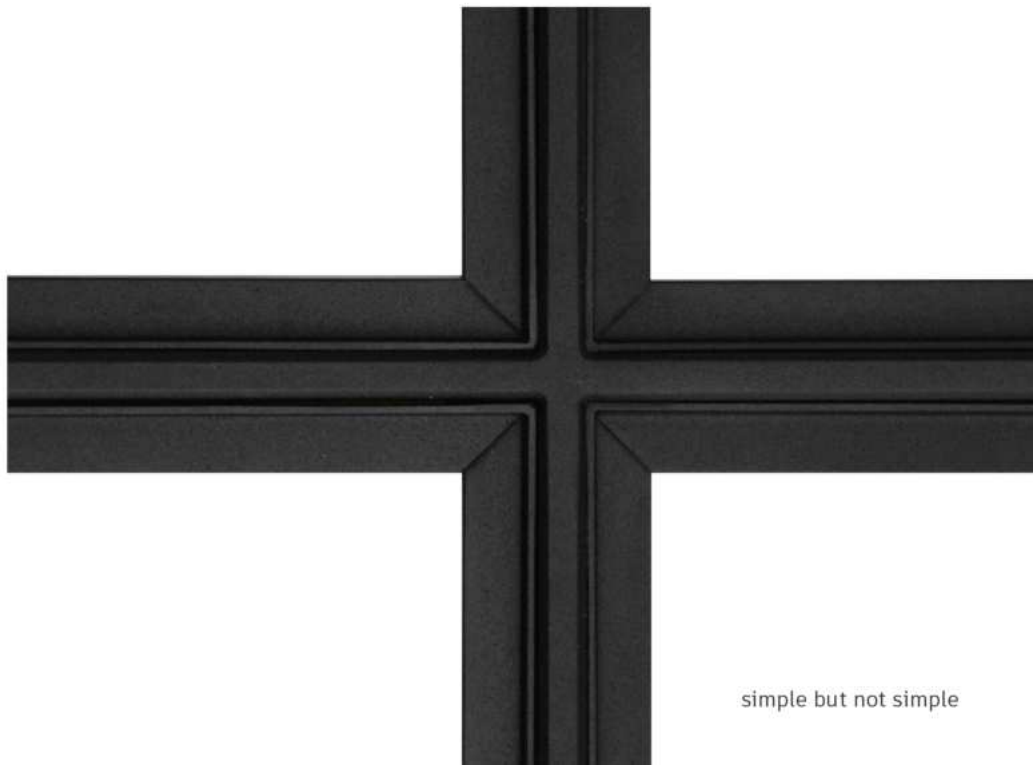

## FRAME SLIM L-Line

### Timeless

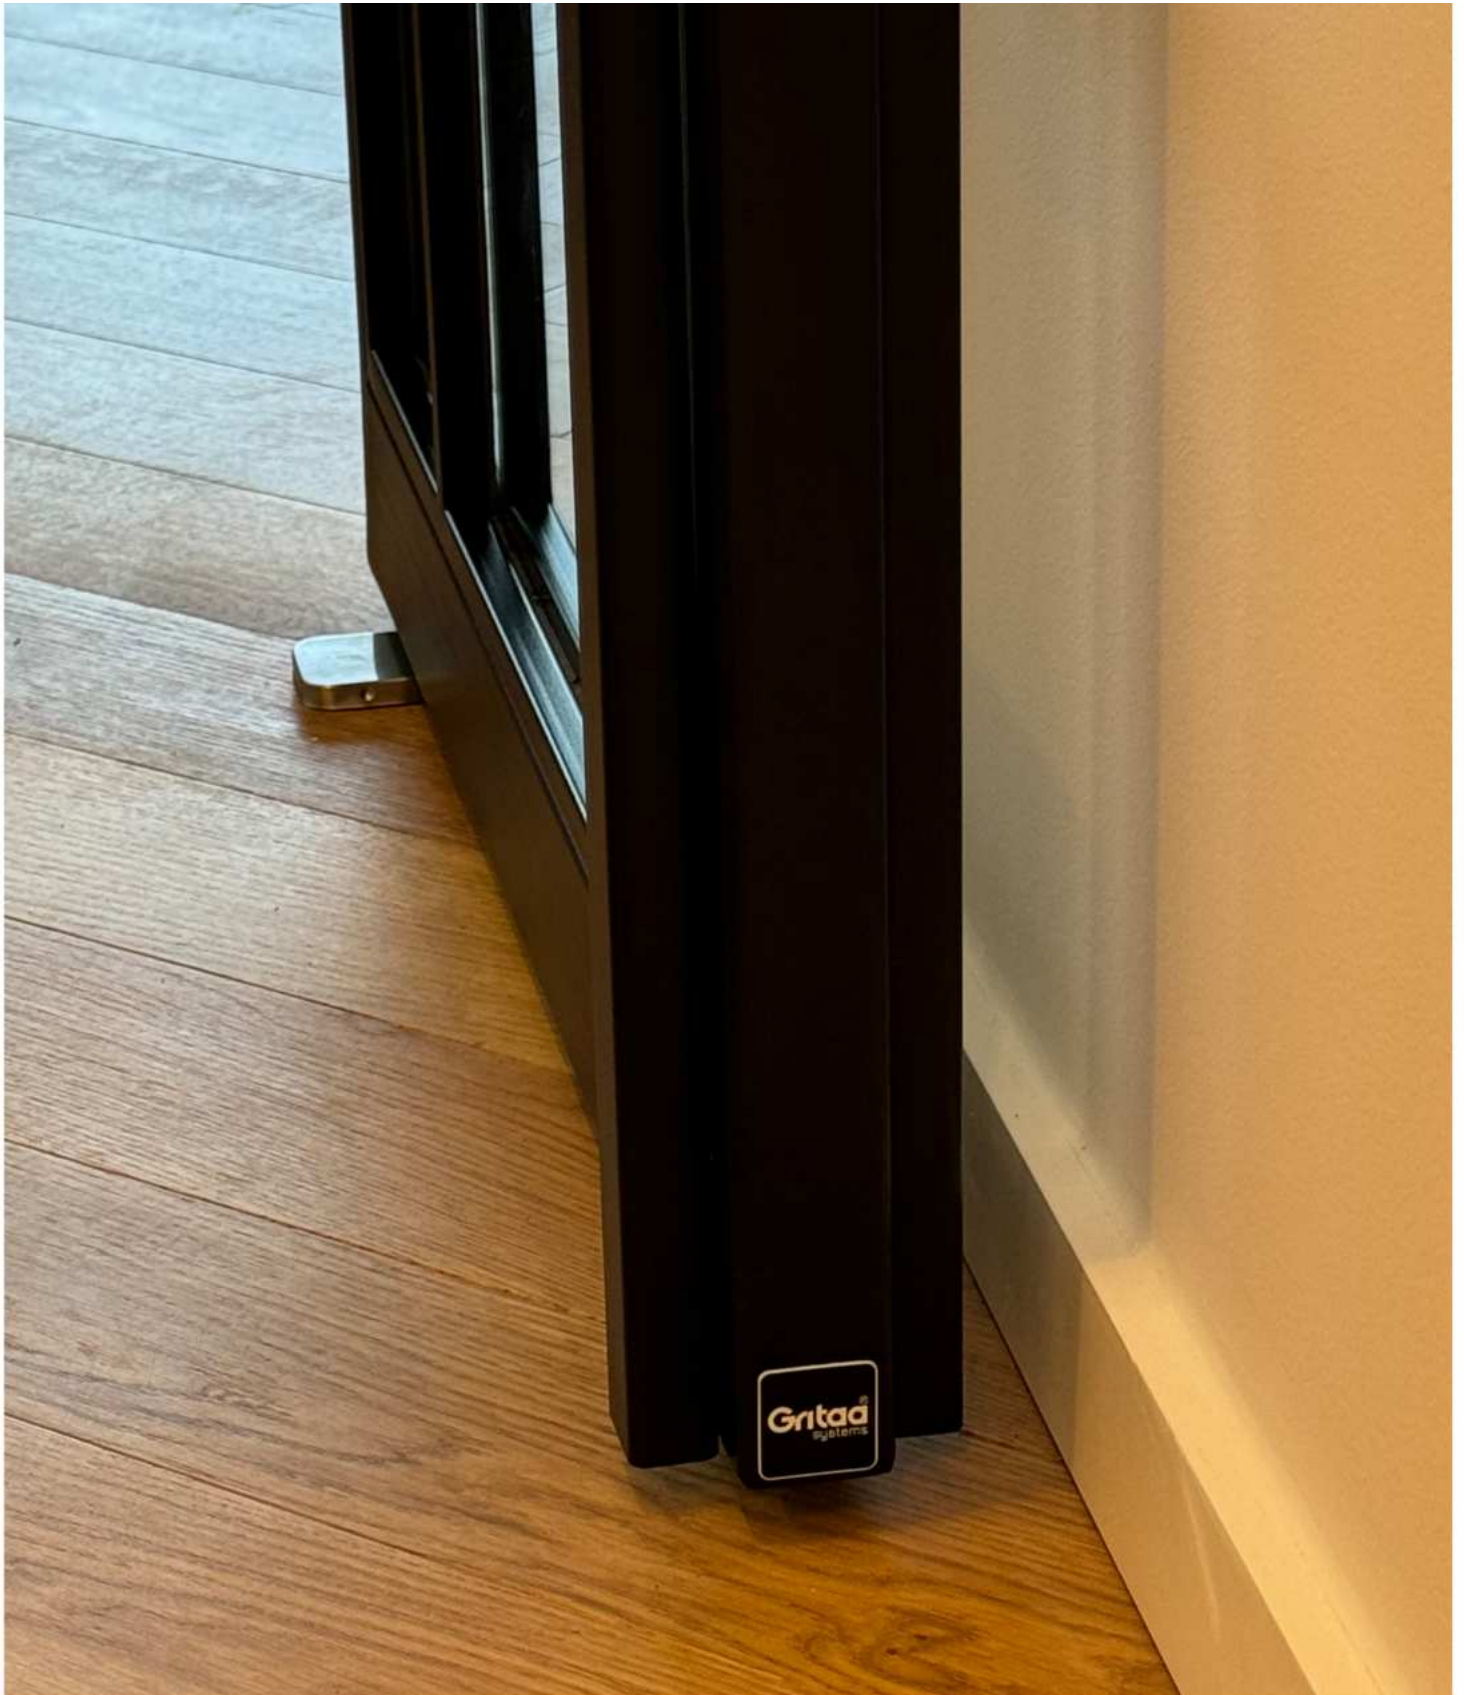

Timelessly elegant, our Slim L-Line inspiration from the industrial aesthetic to give your home a touch of classic sophistication. With options ranging from single steel doors to double doors, there's no limit to discovering your perfect look.

## Durability

Thanks to the exceptionally durable and stable structure of the door's frame and wings made of steel, one chamber (without a thermal barrier with a wall thickness of 1,5mm) with welded and ball-bearing hinges, door will serve you for many years. High quality materials guarantee excellent resistance to any kind of damage.

# GLASS

**glass that  
reflects your  
vision...**

# 07

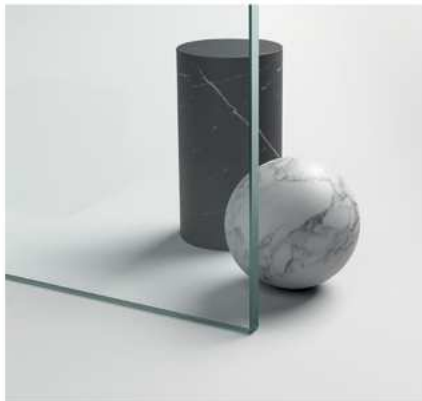

# Types of GLASS

Tempered glass is anywhere between four to five times stronger than traditional glass. This toughness makes it harder to break. Should the glass break, it is engineered in a way where it will shatter into small pieces rather than large jagged edges

Laminated safety glass (VSG) is a laminated glass that meets safety requirements. During production, two individual panes are joined together with an intermediate layer – usually of PVB film – under the effect of pressure and heat to form a solid sandwich
